

Scared of Crows

Player Manual | Group 3

Unity Version	Unity 6 LTS (6000.3.5f2)
Genre	Stealth / Narrative Adventure
Platform	PC — Windows, macOS, Linux
Players	Single Player

Game Overview

You are Pike, a scarecrow who has unexpectedly come to life on a quiet farm. Irony strikes hard: the creatures you were built to frighten have become your greatest fear. Navigate the farm using stealth, avoid crow patrols, and complete three increasingly challenging objectives to protect the farm and save your friend Digby.

Game Objectives

Level 1 — The First Night

Stay hidden from crow patrols from dusk until sunrise. Use haystacks and farm objects as hiding spots. Avoid making noise.

Level 2 — Prove Your Worth

Collect 3 carrots scattered across the farm and deliver them to Digby's trough. You can carry only one vegetable at a time, plan your routes carefully.

Level 3 — Not Just a Scarecrow

Digby has been taken by the crows! Use the collected carrots and throw them at crow guards to clear a path. Beware of the Master Crow who actively pursues you. Manage your vegetables wisely, running out means game over.

How to Win / Lose

WIN	Complete each level's objective: survive until dawn (L1), deliver all carrots (L2), rescue Digby (L3).
LOSE	Be caught by a crow at any time. When time is up in any level. In Level 3, also lose if caught by the Master Crow or if you run out of carrots. A Game Over screen lets you retry.

Game Controls

↑ Up Arrow	Move Forward
↓ Down Arrow	Move Backward

← Left Arrow	Turn Left
→ Right Arrow	Turn Right
Shift	Sprint (increases bell noise — use with caution!)
Space	Jump
F	Pick Up Object
E	Drop Object
Left Click	Throw Object in precise direction (Level 3 only)
ESC	Pause / Resume Game
R	Retry Level after losing

Special Mechanics & Features

Bell Noise System

Pike's bell rings louder the faster you move. Sprinting increases detection risk. If the player hides while having loud bell noise, sound travels through hiding spots, so player still gets detected.

Detection States

Player has three states: Suspicious (noise heard), Detected (crows actively chasing), and Escaped (you hid successfully, crows return to patrol).

Hiding Spots

Haystacks and farm objects provide cover. Hide behind them to break line-of-sight with crows. However, loud movement while hiding can still trigger detection.

Vegetable System

Carry one vegetable at a time. In Level 2 use them as deliveries; in Level 3 throw them at crow guards to clear paths. Running out of vegetables in Level 3 ends the game.

Master Crow (Level 3)

The Master Crow is always in pursuit. Stay on the move and manage open space carefully.

Fog & Lighting

Levels 1, 2, and 3 use fog and darkness to reduce visibility, increasing tension and making crow movement harder to track. Lighting shifts from warm dusk tones to darker night scenes.
